PB&J Algorithm

Equipment
- Peanut Butter
- Jelly
- Bread
- Knife
- Plate
- Table

Algorithm
1. Remove plate from packaging and put it on the counter or table.
2. Put the plates down on table
3. Use knife to remove bread from packaging and place on plate on table
   a. Or pull open packaging
4. Take out 2 slices of bread from packaging and put them on the plate on the table
5. Unscrew lid on peanut butter and set the jar face up on the table
6. Put the lid on the table
7. Remove safety seal from jar
8. Get a knife out of the bag, and use the sharp end of the knife to scoop out some of the peanut butter
9. Put the jar of peanut butter down, so that the closed flat end is on the table
10. Spread the peanut butter on the bread that is on the plate
11. Place bread on plate, peanut butter face up
12. Screw the lid back on the peanut butter jar
13. Put knife back in bag
14. From 5 to 13, except 7, perform actions using jelly instead of peanut butter
15. Pick up the other slice of bread from the plate, the one without the peanut butter and jelly on it
16. Place the goop-less slice of bread on top of the slice of bread with peanut butter and jelly on it such that all 4 edges align
17. Remove knife from bag
18. Cut the sandwich diagonally through the middle
19. Put knife back in bag
