Exercise

- Get into groups of 3-4
  - At least 1 person whom you have never worked with before
  - At least 1 video game player

- Design 3-4 video game characters
  - Brainstorm instance variables and methods for each
  - What is common among the characters
  - How could you use inheritance to take advantage of what is in common?
    - What would your inheritance hierarchy look like

- Work as a group, but each person should write on their own worksheet
Present

- Elect a representative from your group to present your group’s design
Logistics

- Tomorrow:
  - Intro to Search Methods
  - Recursion

- Assignments
